

Ali Dehghan Saei

Academic Curriculum Vitae

Tehran, Iran | a.dehghansaei@iaui.ac.ir | alidehghansaei.com | ORCID 0000-0003-3743-7639 | Google Scholar

RESEARCH PROFILE

Areas: International economic law; WTO non-discrimination; climate governance; carbon-border measures and green subsidies; regulatory equivalence; fair differentiation; regulatory pluralism and climate federalism.

Current research examines how climate objectives are incorporated into economic regulation and how legal frameworks can reconcile market openness with ecological constraint, regulatory diversity, and unequal regulatory capacity. The research programme spans climate-conditioned economic governance (CCEG), carbon-border measures, regulatory recognition, and climate federalism, using doctrinal and comparative methods.

EDUCATION

LLM in International Trade Law

2026

Islamic Azad University, Central Tehran Branch, Iran

Overall average: 18.06/20 | Dissertation mark: 19.75/20

Thesis: "Legal and Systemic Implications of the European Union Carbon Border Adjustment Mechanism (CBAM) for the International Trade Law System."

Supervisor: Dr Mansour Pournouri | Defended 2 September 2026

LLB

2024

Islamic Azad University, Urmia Branch, Iran

Overall average: 18.28/20

MSc Gas Engineering and Management

2018

University of Salford, United Kingdom | With Merit

Overall average: 69.50/100 | Dissertation: 79/100

Thesis: "Behaviour of Solid Particle Erosion in Unequal Pipe Bends (computational fluid dynamics)."

Study period: 2016-2017; degree awarded 2018.

MA Economics

2014

Islamic Azad University, Tabriz Branch, Iran

Thesis: "Fuzzy-stochastic mean-variance portfolio selection."

BSc Chemical Engineering

2003

Amirkabir University of Technology (Tehran Polytechnic), Iran

Specialisation: Petrochemical Industries | Overall average: 14.11/20

RESEARCH EXPERIENCE & METHODS

- LLM research: analysed CBAM through GATT non-discrimination and Article XX, systemic integration under VCLT Article 31(3)(c), and the interaction between trade and climate obligations; examined regulatory equivalence, emissions verification, and unequal compliance capacity.
- Methods: doctrinal treaty interpretation; analysis of WTO reports and EU legislation; structured comparison of regulatory instruments; literature review and source auditing. Earlier research includes quantitative economic analysis and computational modelling.

RESEARCH OUTPUTS

Legal research manuscripts

"Equal Rules, Unequal Burdens: Differentiation without Discrimination in Carbon Border Measures" - *Submitted; with Mansour Pournouri*

"Climate-Conditioned Economic Governance: Reconfiguring Openness in Global Environmental Governance" - *Submitted*

"Climate Federalism as Regulatory Pluralism: Minimum Standards, Equivalence and Economic Governance in Canada" - *Submitted*

"Climate-Conditioned Economic Governance: A Comparative Framework for Regulatory Legitimacy" - *Submitted*

Work in progress

"From EU CBAM to UK CBAM: Regulatory Convergence, Divergence and the Emerging Law of Carbon Borders"

Comparative research on carbon-border design and regulatory recognition.

"Climate Regulatory Recognition"

Developing a legal framework for when and how differing foreign climate regulatory architectures should be treated as sufficiently comparable in economic regulation.

PEER-REVIEWED ENGINEERING PUBLICATIONS

Seven peer-reviewed engineering publications; six in Q1-ranked journals.

Dehghan Saei, A., Baghban, A., Zarei, F., Zhang, Z., and Habibzadeh, S. (2018). "ANFIS based evolutionary concept for estimating nucleate pool boiling heat transfer of refrigerant-ester oil containing nanoparticles." *International Journal of Refrigeration* 96, 38-49. doi:10.1016/j.ijrefrig.2018.08.002.

"Study of intensification of the heat transfer in helically coiled tube heat exchangers via coiled wire inserts." *International Journal of Thermal Sciences* 141, 72-83. doi:10.1016/j.ijthermalsci.2019.03.029.

SELECTED PROFESSIONAL EXPERIENCE

Superintendent | Iranian Offshore Oil Company

Apr 2023-present

Operational and supervisory responsibilities in offshore oil and gas, including project coordination and technical oversight.

Project Manager | National Iranian Gas Company

Jan 2009-Apr 2023

Managed gas-sector projects across engineering and implementation, coordinating contractors and organisational stakeholders.

Project Engineer | National Iranian Gas Company

Nov 2005-Jan 2009

Engineering and project-delivery responsibilities in the gas sector.

Earlier engineering experience

2003-2005

Technical and project-delivery responsibilities in early-career engineering roles.

LANGUAGES

Persian: native | **English:** academic and professional working proficiency.
